

Cumulative Subject Index for Volumes 123–129

A

Abdomen, normal pressure in, in healthy adults, **129**, 231
Abdominal adipose tissue, lipid metabolism in, during surgery, **124**, 23
Abdominal aortic aneurysm
 endovascular repair of, type 2 endoleak significance and hemodynamics in (dogs), **123**, 275
 enhanced, in TIMP deficiency (mice), **123**, 289
Abdominal surgery, immune system and, **126**, 12
Abdominal trauma, laparotomy for, pelvic and extremity injury and, **124**, 3
Abdominal wall defects, pericardial patch in repair of, peritoneal regeneration induced by (rat), **127**, 85
Abstract writing, in surgical research, **128**, 162
Academic surgeons
 Achilles' heel of (special article), **123**, 320
 role of the young voice in (editorial), **126**, 131
Academic surgery
 achieving balance in, **128**, 189
 program development for, **128**, 232, **128**, 238
N-Acetylcysteine
 effect on bacterial translocation after partial hepatectomy (rat), **127**, 164
 preconditioning with, ischemia-reperfusion injury and
 in liver (rats), **129**, 31
 in lung (rats), **129**, 38
Achilles tendon rupture, photochemical repair of (rats), **124**, 274
Acinar cells, pancreatic, STAT3 and SOCS3 expression in (rat), **127**, 14
Activin and receptor, during liver regeneration (rats), **126**, 3
Acute respiratory distress syndrome, endotoxin-induced, Kupffer cells in (rats), **129**, 176
Adenosine, and troponin I degradation during cardiac arrest (rats), **123**, 126
Adenovirus, p53 gene transfer mediated by, to bile duct (rats), **128**, 126
Adhesion formation
 in abdominal wall defect repair using bovine pericardial patch (rat), **127**, 85
 and host tissue response to intraabdominal mesh (rabbits), **123**, 227
 postoperative intraperitoneal, lisinopril prevention of (rats), **125**, 94
Adipocytes, cytokines derived from, endothelial functions and, **126**, 121
Adiponectin, endothelial functions and, **126**, 121
Adipose tissue, omental, lipid metabolism in, during surgery, **124**, 23
Administrative data, in evaluating diagnostic accuracy in appendicitis, **123**, 257
 β -Adrenoceptor blockade, ischemia-reperfusion lung injury reduced by isoproterenol despite (rats), **126**, 114

Aging
 endocrine pancreas and glucose regulation in, somatostatin receptor gene ablation and (mice), **129**, 64
 sepsis-induced apoptosis and (mice), **128**, 37
Akt, in urokinase-induced migration of arterial smooth muscle cells (mouse), **127**, 46
Alloclerm, for burn injury, in elderly patients, **125**, 37
Allograft. *See also* Graft
 chronic neuropathy of, new control for (rats), **128**, 50
 decellularized vein (dogs), **129**, 17
 hepatic, dendritic cells from, migration into recipient spleen, **124**, 29
 hypoplastic lung, persistent vascular defects in (mice), **124**, 14
 limb, donor cell engraftment in recipient lymphoid tissues after (rats), **124**, 38
 rejection of, induced by asialo GM1 positive CD⁸⁺ T cells (mice), **129**, 57
 renal, tacrolimus-induced nephrotoxicity in, pirfenidone reduction of (rats), **125**, 137
Alu elements, in specific genes in primary varicose veins, **123**, 222
Amino acid transport, glutamine-stimulated, in intestinal epithelial cells during ischemia-reperfusion, **123**, 75
 ϵ -Aminocaproic acid, aortic smooth muscle cell proliferation and (mouse), **127**, 39
Aminoguanidine, in refractory hemorrhagic shock (rats), **123**, 206
Amniotic fluid, human, bone healing and (rabbits), **129**, 283
Anal condyloma, dysplasia screening in, **127**, 8
Analgesics, opiate, post-injury immunosuppression and (mice), **129**, 161
Anesthesia, for liver transplantation patients, with glycogen storage disease or biliary atresia, **126**, 82
Aneurysm
 abdominal aortic, Ig κ chain differential expression in, **127**, 118
 ascending aortic, MMP expression in, bicuspid *versus* trileaflet aortic valves and, **123**, 40
Angiogenesis
 HIV-based therapeutic, after hindlimb ischemia (rabbits), **123**, 55
 inhibition by colchicine and 2-methoxyestradiol, **125**, 104
Angiotensin converting enzyme inhibitor
 intestinal wound healing and (rats), **128**, 61
 in preventing postoperative intraperitoneal adhesions (rats), **125**, 94
Angiotensin II
 positive feedback on intrarenal renin-angiotensin system (rats), **129**, 272
 production by chymase in ischemic kidney, in renovascular hypertension (rat), **127**, 65
Angiotensin II type 1 receptor, activation of, calcium-dependent microvascular permeability and, **123**, 33
Animal models, of photodynamic therapy-induced esophageal strictures (mice, pigs), **123**, 67
Antioxidant
 ascorbic acid as, postoperative clearance of, **129**, 46

¹ Boldface numbers indicate volume; lightface numbers indicate pagination.

- hepatic recycling of, after burn injury, DHEA effect on (rat), **127**, 93
 levels in tissue, hyperoxia effect on (mouse), **127**, 80
 Aorta. *See also* Aneurysm
 clamping of, pulmonary apoptosis after (rats), **129**, 190
 endotoxin-released substance from, isolated arteriole dilated by (rat), **127**, 106
 smooth muscle cell proliferation in, plasmin and (mouse), **127**, 39
 Aortic valves, bicuspid *versus* trileaflet, and MMP expression in ascending aortic aneurysms, **123**, 40
 Apoptosis
 pulmonary, after supraceliac aorta clamping (rats), **129**, 190
 after radiofrequency ablation (pigs), **129**, 147
 sepsis-induced, iron and age effects on (mice), **128**, 37
 Appendicitis, evaluating diagnostic accuracy in, administrative data in, **123**, 257
 Aprotinin, aortic smooth muscle cell proliferation and (mouse), **127**, 39
 Arginase, during jaundice (rats), **126**, 19
 Arginine
 renal protective effect of, in ischemia-reperfusion injury (rats), **128**, 132
 supplemental enteral, metabolism in injured patients, **123**, 17
 Arterial graft
 cryopreserved, as vessel substitutes (rats), **124**, 297
 pretreated experimental ePTFE, VEGF roles in (rat), **127**, 70
 Arterial smooth muscle cells, urokinase-induced migration of, phosphoinositol 3-kinase and akt in (mouse), **127**, 46
 Artery bypass, decellularized vein allograft in (dogs), **129**, 17
 Ascorbic acid, postoperative clearance of, **129**, 46
 Asialo GM1 positive CD⁸⁺ T cells, allograft rejection induced by (mice), **129**, 57
 Astrocytes, in hemorrhage, induced hypothermia and (pigs), **126**, 172
 Atherosclerosis, adipocyte-derived cytokines and, **126**, 121
 Autoimmune disease, paraneoplastic, thymoma-associated T cells in, **126**, 34
 Avidin viral coating, in targeting of vaccinia virus (mice), **123**, 49
- B**
- Bacterial translocation
 GM-CSF effect on, after 5-fluorouracil (rats), **128**, 15
 hemorrhagic shock-induced, L-tryptophan effect on (rabbits), **123**, 194
 after partial hepatectomy, *N*-acetylcysteine effect on (rat), **127**, 164
 Bariatric surgery, postoperative mortality in, risk factors for, **127**, 1
 Barrett's adenocarcinoma, MAPK and phosphoinositol 3-kinase inhibition and, **127**, 53
 Barrett's esophagus, new molecular concepts of, **125**, 189
 Basic science faculty, in surgical departments (editorial commentary), **123**, 1, **123**, 153
 Basic science research publications, citation characteristics in, **128**, 168
 Bcl-2 mRNA, in T cells, in liver transplantation, **127**, 123
 Bid, truncated, TNF- α -induced hepatocyte apoptosis suppressed by (mouse), **127**, 157
 Bile duct, adenovirus-mediated p53 gene transfer to (rats), **128**, 126
 Biliary atresia, in liver transplantation patients, anesthetic management and, **126**, 82
 Biliary duct embolization, chemical, in chemical hepatectomy (rabbit), **127**, 131
 Biliary tract carcinoma, micrometastatic, cytokeratin as marker for, **125**, 9
 Biocompatibility testing, of vascular prostheses (pigs, sheep), **124**, 305
 Bioprosthesis, in herniorrhaphy, small intestine submucosa as, physiologic properties of (pigs), **123**, 262
 Biotin viral coating, in targeting of vaccinia virus (mice), **123**, 49
 Blood flow
 carnitine and, in hepatic ischemia-reperfusion injury (rats), **125**, 16
 hepatic, measurement with xenon CT system (rabbits), **129**, 24
 mesenteric, nitric oxide synthase blocker and (mice), **124**, 67
 Bone healing, human amniotic fluid and (rabbits), **129**, 283
 Bone marrow, collection from vertebral bodies, for transplant studies (cynomolgus macaques), **124**, 280
 Bowel, severe seromuscular defect of, free peritoneal graft for, **125**, 3
 Brain death, organ-specific immunoresponse after (pigs), **123**, 118
 Brain injury, traumatic, intestinal NF- κ B, TNF- α , and IL-6 after (rats), **123**, 188
 Brain natriuretic peptide, plasma level in LVAD patient, cardiac function and, **123**, 25
 Breast cancer
 estrogen receptor α -positive, ZER6 expression in, **126**, 86 (commentary), **126**, 1
 hypoxic augmentation of proteases in, **124**, 180
 NF- κ B/I κ B signaling system in (research review), **123**, 158
 Breast cancer cells, Topotecan cytotoxicity in, Quercetin effect on, **125**, 49
 Breath test, ornithine, to evaluate functional liver volume (rats), **124**, 9
 Burn injury. *See also* Trauma
 in children, gene expression in muscle of, **123**, 144
 in elderly patients, Alloderm for, **125**, 37
 esophageal strictures from, mitomycin C and (rats), **123**, 182
 gut mucosal homeostasis and cell mediators after, growth hormone and (rat), **127**, 183
 hepatic metabolism after, DHEA effect on (rat), **127**, 93
 morphine for, immunosuppression and (mice), **129**, 161
Pseudomonas aeruginosa infection susceptibility after, protamine sulfate and (mice), **123**, 109
 wound healing after, insulin therapy and (rats), **129**, 169(erratum)
 Burn research, transgenic animals and gene knock-out techniques in (research review), **123**, 328
 Bursting pressure, after preoperative chemotherapy, in colorectal cancer (rats), **124**, 209
- C**
- Calcium, intracellular, angiotensin II type 1 receptor activation and, **123**, 33
 Candidiasis, vaginal, estrogen and (rats), **129**, 278
 Capillary flowmotion, heat shock-induced, in osteomyocutaneous flaps (rats), **123**, 102
 Carbohydrate antigen 19-9 (CA19-9), in colorectal cancer prognosis, **124**, 169
 Carbon dioxide pneumoperitoneum, electron microscopic peritoneal alterations after (rats), **125**, 73
 Carcinoembryonic antigen (CEA), in colorectal cancer prognosis, **124**, 169
 Carcinoid heart disease, animal model of (mice), **126**, 102
 Cardiac. *See also* Heart
 Cardiac arrest, troponin I degradation during, adenosine and (rats), **123**, 126
 Cardiac function, in LVAD patient, plasma brain natriuretic peptide and endothelin-1 levels and, **123**, 25
 Cardiac protection, preconditioning threshold in, gender and (rats), **125**, 168
 Cardiopulmonary bypass, pathophysiological consequences of (rats), **123**, 171
 Carnitine, hepatic ischemia-reperfusion injury and (rats), **125**, 16
 Caspase-3, inhibition after myocardial infarction (mice), **124**, 194
 Cava vein drainage, in autologous ovarian transplantation (rats), **124**, 175
 CD4- CD8- T cells, immunologic function of (transgenic mice), **126**, 160

- CD8⁺ T cells, asialo GM1 positive, allograft rejection induced by (mice), **129**, 57
- CD14, gene polymorphism in, and clinical outcome of critically ill patients, **129**, 322
- CD40L, T cell anti-tumor response augmented by, **125**, 173
- CD71, monocytes expressing, responses after non-thermal injury, **129**, 221
- CD95, in esophageal adenocarcinoma, **123**, 302
- cDNA array profiling. *See* Gene expression profiling
- Cecal ligation and puncture
inflammatory response to, negative outcome and (mice), **125**, 88
lethal and non-lethal sepsis after, oxidative stress in (rats), **125**, 68
- Cellular senescence, pressure-induced, **124**, 112
- Celsior preservation solution, microvascular protection by, during ischemia-reperfusion (rats), **125**, 182
- Central nervous system
acute damage to, intestinal ischemia-reperfusion injury and (rats), **129**, 288
protection through induced hypothermia (pigs), **126**, 172
- Chemoattractant molecules, in organ-specific immunoresponse, after brain death (pigs), **123**, 118
- Chemokines, in liver donor allograft dendritic cell migration into recipient spleen, after liver transplantation (rats), **124**, 29
- Chemotherapy, preoperative, in colorectal cancer, operation time and (rats), **124**, 209
- Children
neuroblastoma cells in, VEGF-mediated survivin expression in, **127**, 21
thermal injury in, gene expression in muscle of, **123**, 144
- Chitosan hydrogel, FGF-2 in, efficacy in chronic myocardial infarction (rabbits), **126**, 27
- Cholangitis, adenovirus-mediated p53 gene transfer in, to bile ducts (rats), **128**, 126
- Cholecystokinin, intestinal response to, in leptin deficiency with obesity (mice), **124**, 146
- Cholestasis, oxidative stress in, resveratrol protection against (rat), **127**, 112
- Chymase, angiotensin II production by, in ischemic kidney, in renovascular hypertension (rat), **127**, 65
- Cirrhosis, liver regeneration in, hyperbaric oxygenation and (mice), **129**, 260
- Citation characteristics, in scientific writing, **128**, 168
- Citrulline, as marker for intestinal failure in short bowel syndrome, **127**, 177
- Clenbuterol, effects on skeletal muscle ventricle (dogs), **123**, 89
- Clinical research, American, sustaining, **125**, 1, **125**, 117
- Cognitive function, in hemorrhage, induced hypothermia and (pigs), **126**, 172
- Colchicine, angiogenesis inhibition by, **125**, 104
- Colectomy, for diverticulitis, **124**, 318
editorial, **124**, 159
- Collagen sponges, fibroblast-seeded, for skin defects/ulcers (guinea pigs), **125**, 56
- Collagen synthesis, in skin, in obstructive jaundice, **124**, 237
- Colon, cAMP-activated chloride secretion in, luminal orthovanadate inhibition of (rats), **129**, 85
- Colonic surgery, omental adipose tissue during, lipid metabolism in, **124**, 23
- Colorectal cancer/carcinoma
CEA and CA19-9 prognostic value in, **124**, 169
gastrointestinal hormone receptors in, **129**, 313
editorial, **129**, 171
gene expression profiling in, lymph node metastasis and, **124**, 216
hypoxic augmentation of proteases in, **124**, 180
operation time in, preoperative chemotherapy application and (rats), **124**, 209
tumor infiltrating lymphocytes in, **129**, 172
- Colostomy, for diverticulitis, **124**, 318
- editorial, **124**, 159
- Computers, as research tool, **128**, 178
- Condyloma, anal, dysplasia screening in, **127**, 8
- Coristatin, TNF- α effects on, in coronary endothelial cells, **123**, 294
- Coronary arteries
endothelial dysfunction in, progesterone and estrogen effects on (pigs), **124**, 104
vasomotor functions of, lysophosphatidylcholine and (pigs), **126**, 182
- Coronary endothelial cells, TNF- α effects on somatostatin, somatostatin receptors, and coristatin in, **123**, 294
- Critically ill patients, clinical outcome of, effects of Toll-like receptor 4, CD14, TNF, and IL-10 gene polymorphisms on, **129**, 322
- Cryopreserved arterial grafts, as vessel substitutes (rats), **124**, 297
- Curcumin, NF- κ B activation inhibited by, after cardiac ischemia-reperfusion (rabbits), **125**, 109
- Cyanoacrylate adhesive, absorbable, as suture line sealant (sheep), **125**, 161
- Cyclooxygenase-2
Kupffer cell ablation and, after trauma and sepsis (rats), **124**, 126
in pathophysiology of hemorrhagic shock (rats), **123**, 206
upregulation in diabetic macrophages (rats), **125**, 121
- Cyclophilin A
dendritic cell differentiation and, **127**, 21
effects on vascular smooth muscle cells and endothelial cells, **123**, 312
- Cytokeratin, as micrometastatic biliary tract carcinoma marker, **125**, 9
- Cytokines
adipocyte-derived, endothelial functions and, **126**, 121
heat shock inhibition of, in Kupffer cells (mice), **129**, 114
immune response and, in abdominal surgery, **126**, 12
in organ-specific immunoresponse, after brain death (pigs), **123**, 118
proinflammatory, increased by thrombin and PAR-1-activating peptide (rats), **129**, 196
STAT3 and SOCS3 induction by, in pancreatic acinar cells (rat), **127**, 14
vascular hyporeactivity and, after hemorrhagic shock (rats), **125**, 128

D

- Dehydroascorbate, protective role in liver ischemia-reperfusion injury (rats), **123**, 215
- Dehydroepiandrosterone, effect on hepatic metabolism after thermal injury (rat), **127**, 93
- Dendritic cells
cotransfection with TLR4 and MART-1 RNA, **124**, 264
differentiation of, cyclophilin A and, **127**, 21
donor, migration into recipient spleen after liver transplantation (rats), **124**, 29
- Diabetes mellitus, macrophage COX-2 gene upregulation and PGE₂ production in (rats), **125**, 121
- Diabetic nephropathy, Pravastatin and (rats), **123**, 176
- Diarrhea, luminal orthovanadate inhibition of (rats), **129**, 85
- Diurnal rhythm, intestinal, vagus nerve and (rats), **129**, 73
- Diverticulitis, management of, temporal changes in, **124**, 318
editorial, **124**, 159
- Donor cell engraftment, in recipient lymphoid tissues, after limb allograft (rats), **124**, 38
- Donor dendritic cells, migration into recipient spleen, after liver transplantation (rats), **124**, 29
- Donor organs, immunoresponse in, after brain death (pigs), **123**, 118
- Doxorubicin, sonoporation with, intimal hyperplasia suppression by (rabbits), **124**, 312
- Dysplasia screening, in anal condyloma, **127**, 8

E

Edema, resuscitation-induced, reversal by L-NIL (rats), **129**, 1
 Education. *See* Medical education; Training
 Elderly patients, burn injury in, Alloderm for, **125**, 37
 Electron microscopic alterations, peritoneal, after carbon dioxide pneumoperitoneum (rats), **125**, 73
 Embolization, chemical, of biliary duct, in chemical hepatectomy for hepatolithiasis (rabbit), **127**, 131
 EMLA (topical lidocaine and prilocaine), flap survival enhanced by (rats), **124**, 134
 Endoleak type 2, after endovascular repair of abdominal aortic aneurysm, significance and hemodynamics of (dogs), **123**, 275
 Endopeptidase, neutral, and severity of pancreatitis-associated lung injury (mice), **128**, 21
 editorial, **128**, 1
 Endoscopy, robotic systems *versus* traditional, skill training for, **125**, 23
 Endothelial cells
 coronary, TNF- α effects on somatostatin, somatostatin receptors, and coristatin in, **123**, 294
 differentiation from mononuclear cells (dogs), **126**, 193
 pulmonary, zinc pretreatment of, in endotoxemia (pigs), **123**, 251
 vascular, cyclophilin A effects on, **123**, 312
 Endothelial function/dysfunction
 adipocyte-derived cytokine effects on, **126**, 121
 in coronary arteries, progesterone and estrogen effects on (pigs), **124**, 104
 lysophosphatidylcholine and (pigs), **126**, 182
 Endothelial progenitor
 cellular migration and differentiation of, smooth muscle TGF β 1 in, **125**, 151
 defective endogenous, and persistent vascular defects in hypoplastic lung allografts (mice), **124**, 14
 Endothelin-1
 plasma level in LVAD patient, cardiac function and, **123**, 25
 vascular hyporeactivity and, after hemorrhagic shock (rats), **125**, 128
 Endotoxemia
 after partial hepatectomy, fibronectin and (rats), **124**, 79
 zinc pretreatment of pulmonary endothelial cells in (pigs), **123**, 251
 Endotoxin
 aorta substance released by, isolated arteriole dilated by (rat), **127**, 106
 lung injury induced by, Kupffer cells in (rats), **129**, 176
 pulmonary vasoreactivity after exposure to, nitric oxide and (rat), **127**, 197
 Energy metabolism, after hypothermic preservation of heart, nucleoside-nucleotide mixture and (rat), **127**, 144
 Enteral diet
 infusion of, swivel for (rats), **128**, 3
 supplemental arginine in, metabolism in injured patients, **123**, 17
 Enterocyte, mitochondrial changes in, after intraluminal hyperoxygenated solution for intestinal ischemia-reperfusion injury (rabbits), **129**, 298
 Epithelial cells, intestinal, ischemia-reperfusion in, glutamine-stimulated amino acid transport during, **123**, 75
 ERK. *See* Extracellular signal-regular kinase
 Esophageal adenocarcinoma, p53 and Fas (CD95) in, **123**, 302
 Esophageal cancer, ischemic gastric tube in, lipo-prostaglandin E₁ effect on (pigs), **129**, 79
 Esophageal perfusion, external, esophageal injury with (rats), **129**, 107
 Esophageal pH, in pharyngeal reflux diagnosis, **128**, 55
 Esophageal stricture
 caustic, mitomycin C and (rats), **123**, 182
 photodynamic therapy-induced (mice, pigs), **123**, 67

Esophagus
 Barrett's, new molecular concepts of, **125**, 189
 reconstruction with extracellular matrix and muscle tissue (dogs), **128**, 87
 Estrogen
 coronary artery endothelial dysfunction and (pigs), **124**, 104
 in protection of liver and intestine against sepsis-induced injury (rats), **128**, 70
 vaginal candidiasis and (rats), **129**, 278
 Estrogen receptor- α , breast cancer positive for, ZER6 expression in, **126**, 86
 (commentary), **126**, 1
 Ethics, in research, **128**, 221
 Extracellular matrix
 in esophageal reconstruction (dogs), **128**, 87
 on PTFE arterial grafts, VEGF roles in (rat), **127**, 70
 Extracellular matrix remodeling genes, in hemorrhagic shock and resuscitation (rats), **123**, 235
 Extracellular signal-regular kinase (ERK), α v β 3-mediated activation of, integrin α 5 β 1 regulation of (hamsters), **123**, 200
 Extremity. *See also* Limb entries
 injury of, effect on laparotomy for abdominal trauma, **124**, 3
 lower, ischemia-reperfusion of, pulmonary expression of inducible heme-oxygenase after (rats), **129**, 306

F

Famotidine, in augmenting tumor infiltrating lymphocytes, in colorectal cancer, **129**, 172
 Fas, trafficking and apoptosis mediated by, in esophageal adenocarcinoma, p53 and, **123**, 302
 Fas ligand expression, after in liver hepatic ischemia-reperfusion injury (rats), **125**, 30
 Fibroblast
 collagen sponges seeded with, for skin defects/ulcers (guinea pigs), **125**, 56
 hypertrophic, from scar, IL-1 β -induced genes in, **126**, 59
 Fibroblast growth factor-2, chitosan hydrogel containing, efficacy in chronic myocardial infarction (rabbits), **126**, 27
 Fibronectin, in protection against endotoxin-induced liver injury after partial hepatectomy (rats), **124**, 79
 Flap survival, EMLA enhancement of (rats), **124**, 134
 Fluid accumulation, gastric luminal, lipopolysaccharide-induced, ketamine inhibition of (rat), **127**, 203
 5-Fluorouracil, GM-CSF effect on bacterial translocation after (rats), **128**, 15
 Funding, obtaining of, for research, **128**, 226

G

Gastric cancer
 liver and peritoneal metastasis of, classification by genes, **129**, 94
 lymph node metastasis, recurrence, and survival in, cDNA profiling and, **124**, 225
 MgSOD genetic polymorphisms and, **124**, 92
 morphology of, K-*ras* mutation and, **124**, 74
 tumor-draining lymph nodes in, regulatory T cell distribution in, **124**, 151
 Gastric injury, LPS-induced, nitric oxide synthase inhibition and (rats), **129**, 265
 Gastric luminal fluid accumulation, lipopolysaccharide-induced, ketamine inhibition of (rat), **127**, 203
 Gastric tube, ischemic, lipo-prostaglandin E₁ effect on (pigs), **129**, 79
 Gastroesophageal reflux disease
 Barrett's esophagus from, new molecular concepts of, **125**, 189
 diagnosis of, **128**, 55
 external esophageal perfusion for, esophageal injury with (rats), **129**, 107

- Gastrointestinal hormone receptors, in colorectal carcinomas, **129**, 313
 editorial, **129**, 171
- Gastrointestinal surgery, immune system and, **126**, 12
- Gelatinase, hypoxic augmentation of, in adenocarcinomas, **124**, 180
- Gender
 hepatic pathophysiology and (mice) (research review), **128**, 147
 preconditioning and, **129**, 202
 (rats), **125**, 168
- Gene expression profiling
 in colorectal cancer, lymph node metastasis and, **124**, 216
 in gastric cancer, lymph node metastasis, recurrence, and survival in, **124**, 225
 in primary varicose veins, **123**, 222
- Gene therapy, VEGF, nanosphere delivery of, for limb ischemia (rabbits), **126**, 48
- Genomics, functional, **128**, 194
- Geranylgeranyltransferase I inhibition, effect on vascular ROS and nitric oxide production (rats), **124**, 256
- Geriatric patients, burn injury in, Alloderm for, **125**, 37
- Glucose, regulation in aging, somatostatin receptor gene ablation and (mice), **129**, 64
- Glutamine, amino acid transport stimulated by, in intestinal epithelial cells during ischemia-reperfusion, **123**, 75
- Glycogen storage disease, in liver transplantation patients, anesthetic management and, **126**, 82
- GP-2A, aortic smooth muscle cell proliferation and (mouse), **127**, 39
- Graft. *See also* Allograft
 cryopreserved arterial, as vessel substitutes (rats), **124**, 297
 free peritoneal, for severe seromuscular bowel defect, **125**, 3
 pretreated experimental ePTFE arterial, VEGF roles in (rat), **127**, 70
 vascular prosthetic, preventing infection by rifampicin-soaked graft and systemic vancomycin (rats), **129**, 329
- Graft intimal hyperplasia, autologous venous (mice), **126**, 106
- Grant writing, for research funding, **128**, 226
- Granulocyte macrophage colony-stimulating factor
 effect on bacterial translocation, after 5-fluorouracil (rats), **128**, 15
 T cell anti-tumor response augmented by, **125**, 173
- Growth hormone, effect on gut mucosal homeostasis and cellular mediators, after burn injury (rat), **127**, 183
- Guanylate cyclase, soluble, desensitization of, in developing tolerance to organic nitrates (dogs), **123**, 82
- Gut injury, pneumonia-induced, PARP inhibitor and (rabbits), **129**, 292

Ornithine breath test, to evaluate functional liver volume (rats), **124, 9**

Ornithine transcarbamoylase, during jaundice (rats), **126, 19**

Orthopedic surgical residency, measuring medical education and curriculum during, **123, 268**

Orthovanadate, luminal, cAMP-activated chloride secretion inhibited by, in colon (rats), **129, 85**

Osteomyocutaneous flaps, heat shock-induced capillary flowmotion in (rats), **123, 102**

Osteosarcoma, invasion by, matrix metalloproteinases in, **127, 151**

Outcomes research, in surgery, **128, 218**

Ovarian transplantation, autologous, venous drainage and (rats), **124, 175**

Oxidative stress
 in cholestasis, resveratrol protection against (rat), **127, 112**
 in lethal and non-lethal sepsis (rats), **125, 68**
 in liver ischemia-reperfusion injury
 dehydroascorbate protective role in (rats), **123, 215**
 mitochondria in (rats), **124, 160**

Oxygenation
 hyperbaric, and liver regeneration in cirrhosis (mice), **129, 260**
 preconditioned hyperbaric, in protecting liver against ischemia-reperfusion injury (rats), **128, 28**
 of skeletal muscle, during ischemia-reperfusion (rabbits), **128, 9**

Oxytocin, in prevention of sepsis-induced multiple organ damage (rats), **126, 73**

P

p38 MAPK
 in cyclophilin A effect on dendritic cell differentiation, **127, 21**
 inhibition by β -opioid agonist (mice), **128, 45**

p53, Fas and, in esophageal adenocarcinoma, **123, 302**

p53 gene transfer, adenovirus-mediated, to bile duct (rats), **128, 126**

Pancreas, regulation in aging, somatostatin receptor gene ablation and (mice), **129, 64**

Pancreatic acinar cells, STAT3 and SOCS3 expression in (rat), **127, 14**

Pancreatic adenocarcinoma, hypoxic augmentation of proteases in, **124, 180**

Pancreatic cancer
 inositol hexaphosphate for, **126, 199**
 macrophage inflammatory protein-3 α in, **123, 96**

Pancreatitis, lung injury associated with, neutral endopeptidase and severity of (mice), **128, 21**
 editorial, **128, 1**

Parenteral infusion, swivel for (rats), **128, 3**

Pelvic injury, effect on laparotomy for abdominal trauma, **124, 3**

Perfusion, lung, melphalan lung levels after (rats), **125, 157**

Peripheral blood mononuclear cells, endothelial cell differentiation from (dogs), **126, 193**

Peritoneal grafts, free, for severe seromuscular bowel defect, **125, 3**

Peritoneal regeneration, induced by pericardial patch, in abdominal wall defect repair (rat), **127, 85**

Peritoneum, gastric cancer metastasis to, classification by genes, **129, 94**

Pertussis toxin, aortic smooth muscle cell proliferation and (mouse), **127, 39**

pH, esophageal, in pharyngeal reflux diagnosis, **128, 55**

Pharyngeal reflux, diagnosis of, **128, 55**

Phosphoinositol 3-kinase
 aortic smooth muscle cell proliferation and (mouse), **127, 39**
 inhibition of, Barrett's adenocarcinoma and, **127, 53**
 in urokinase-induced migration of arterial smooth muscle cells (mouse), **127, 46**

Photodynamic therapy, esophageal stricture induced by (mice, pigs), **123, 67**

Photosensitization, for tendon repair (rats), **124, 274**

Pinealectomy, melatonin effect on wound healing after (rats), **123, 3**

Pirfenidone, tacrolimus-induced nephrotoxicity reduced by (rats), **125, 137**

Pituitary tumor transforming gene, molecular marker of, in liver regeneration (rats), **129, 142**

Plasmin, smooth muscle cell proliferation and (mouse), **127, 39**

Platelet releasates, expired preserved, proliferative activity retained by, **126, 55**

Pneumonia, sepsis and gut injury induced by, PARP inhibitor and (rabbits), **129, 292**

Pneumoperitoneum, carbon dioxide, electron microscopic peritoneal alterations after (rats), **125, 73**

Polyester vascular prostheses, biocompatibility testing of (pigs, sheep), **124, 305**

- Poly-(ADP-ribose) polymerase inhibitor, effect on pneumonia-induced sepsis and gut injury (rabbits), **129**, 292
- Polypropylene mesh, intraabdominal, adhesion formation and (rabbits), **123**, 227
- Porcine endogenous retrovirus infection, after transgenic liver perfusion (baboons), **124**, 45
- Portal tissue blood flow, measurement with xenon CT system (rabbits), **129**, 24
- Portal vein drainage, in autologous ovarian transplantation (rats), **124**, 175
- Portal vein ligation, hepatectomy and, liver regeneration after, activin and receptor in (rats), **126**, 3
- Pravastatin, diabetic nephropathy and (rats), **123**, 176
- Preconditioning
 - with *N*-acetylcysteine, ischemia-reperfusion injury and
 - in liver (rats), **129**, 31
 - in lung (rats), **129**, 38
 - gender and, **129**, 202
 - threshold for (rats), **125**, 168
 - hyperbaric oxygenation, in protecting liver against ischemia-reperfusion injury (rats), **128**, 28
 - ischemic
 - intestinal, protein kinase C in (rats), **124**, 289
 - and liver regeneration after partial hepatectomy (rats), **125**, 42
 - skeletal remote, for myocardial protection (rats), **126**, 92
- Preservation solutions, microvascular protection by, during ischemia-reperfusion (rats), **125**, 182
- Preservation-reperfusion injury, in fatty liver, nutritional status and (rat), **127**, 190
- Prilocaine/lidocaine, topical (EMLA), flap survival enhanced by (rats), **124**, 134
- Pringle maneuver, for hepatectomy, remnant liver injury after, ONO-1714 inhibition of (pigs), **125**, 78
- Progesterone, coronary artery endothelial dysfunction and (pigs), **124**, 104
- Prostaglandin E₁. *See also* Lipo-prostaglandin E₁
 - in hepatic blood flow measured with xenon CT (rabbits), **129**, 24
- Prostaglandin E₂
 - nitric oxide interaction with, in hemorrhagic shock (rats), **123**, 206
 - production by macrophages, in diabetes (rats), **125**, 121
- Prostheses, vascular
 - biocompatibility testing of (pigs, sheep), **124**, 305
 - preventing infection by rifampicin-soaked graft and systemic vancomycin (rats), **129**, 329
- Protamine sulfate, and *Pseudomonas aeruginosa* infection susceptibility after thermal injury (mice), **123**, 109
- Protease, hypoxic augmentation of, in adenocarcinomas, **124**, 180
- Protease-activated receptor-1-activating peptide, proinflammatory cytokines increased by (rats), **129**, 196
- Protein kinase C, in intestinal ischemic preconditioning (rats), **124**, 289
- Pseudomonas aeruginosa* infection, susceptibility after thermal injury, protamine sulfate and (mice), **123**, 109
- Pulmonary. *See also* Lung entries
- Pulmonary endothelial cells, zinc pretreatment of, in endotoxemia (pigs), **123**, 251
- Pulmonary vasoreactivity, endotoxin and nitric oxide effects on (rat), **127**, 197
- Pulse oximetry, for intraoperative determination of intestinal viability (rabbits), **128**, 66
- Q**
- Quercetin, effect on Topotecan cytotoxicity in breast cancer cells, **125**, 49
- R**
- Radiation, intimal hyperplasia prevention with, vascular wall chronic changes in (rabbits), **128**, 120
- Radiofrequency ablation
 - apoptosis and heat shock protein expression after (pigs), **129**, 147
 - pulmonary lesions from, vessel diameter and (sheep), **124**, 85
- Radiofrequency ablation and plication, of hemorrhoids, **126**, 66
- Reactive oxygen species, vascular, geranylgeranyltransferase I inhibition and (rats), **124**, 256
- Reconstructive surgery, adult stem cells in, **124**, 201
- Rectal cancer, one hand-size incision surgery for, without laparoscopy, **129**, 136
- Regenerative medicine
 - adult stem cells in, **124**, 201
 - esophageal, extracellular matrix and muscle tissue in (dogs), **128**, 87
- Releasates, expired liquid preserved platelet, proliferative activity retained by, **126**, 55
- Renal. *See also* Kidney
- Renal function, ischemia-reperfusion injury and, protective effect of molsidomine and arginine (rats), **128**, 132
- Renal transplantation, chronic allograft neuropathy in, new control for (rats), **128**, 50
- Renin-angiotensin system, intrarenal, angiotensin II positive feedback on (rats), **129**, 272
- Renovascular hypertension, ischemic kidney in, angiotensin II production in (rat), **127**, 65
- Reperfusion, of isolated heart, membrane oxygenation *versus* parabolic support in (rabbits), **125**, 98
- Reperfusion injury. *See also* Ischemia-reperfusion injury
 - after lung transplantation, hyperinflation and (rabbits), **123**, 134
 - after preservation, in fatty liver, nutritional status and (rat), **127**, 190
